

GABRIEL FURTADO

Data Scientist · Machine Learning Engineer

São Paulo, Brazil gabriel.g.furtado30@gmail.com linkedin.com/in/gabriel-furtado30 github.com/GFurts
Portfolio: gabriel-furtado.vercel.app

PROFESSIONAL SUMMARY

Data Scientist / Machine Learning Engineer with a BSc in Data Science (Mackenzie), BSc in Business Administration (UNIP), and a postgraduate degree in Data Analytics (FIAP). 7+ years of prior experience in marketing analytics, performance measurement, and data-driven decision making. Builds end-to-end machine learning projects with Python, scikit-learn, PyTorch, MLflow, FastAPI, Docker, and CI/CD, focused on real business problems such as churn prediction, product recommendation, and educational risk. Currently pursuing a postgraduate specialization in Machine Learning Engineering (FIAP, expected 2027).

TECHNICAL SKILLS

Machine Learning & Modeling

PyTorch · scikit-learn · XGBoost · MLP · Embeddings · Feature Engineering · Threshold Tuning

MLOps & Deployment

MLflow · DVC · FastAPI · Docker · GitHub Actions (CI/CD) · pytest · REST APIs

Data & Analytics

Python · Pandas · NumPy · SQL · EDA · Data Visualization · Streamlit · Jupyter

Marketing Analytics & Business

CAC · ROAS · Conversion Funnel · Meta Ads · Google Ads · Google Analytics 4 · A/B Testing

PROJECTS

Churn Prediction ML | PyTorch · FastAPI · MLflow · Docker · pytest · GitHub Actions

github.com/GFurts/Churn-Prediction-ML

End-to-end ML pipeline · Live API: churn-prediction-ml-e4f1.onrender.com

- ▶ PyTorch MLP classifier for telecom churn prediction; AUC-ROC 0.89, Precision 0.82, Recall 0.79 on held-out test set
- ▶ Full experiment tracking with MLflow Model Registry; class-imbalance handling; Logistic Regression selected for production over MLP after interpretability analysis
- ▶ FastAPI + Pydantic REST inference API; Docker containerization; CI/CD via GitHub Actions; threshold tuned for business cost matrix

Recommender System (RetailRocket) | PyTorch · DVC · MLflow · Docker · FastAPI

E-commerce recommendation engine · github.com/GFurts/recsys-retailrocket · Live API: recsys-retailrocket.onrender.com

- ▶ MLP with learned user and item embeddings on RetailRocket dataset; Precision@10 0.74, NDCG 0.71 on evaluation set
- ▶ 4-stage reproducible DVC pipeline; MLflow Model Registry; Docker multi-stage build; 11 pytest tests, 100% pass rate

Educational Risk Prediction — Passos Magicos NGO | XGBoost · Streamlit · scikit-learn

github.com/GFurts/educational-risk-prediction

FIAP Datathon · Educational risk and academic gap prediction · Dashboard: educational-risk-prediction.streamlit.app

- ▶ Unified dataset from 3 years of PEDE survey data (2022–2024); schema normalization and LGPD-compliant data handling
- ▶ XGBoost with threshold tuning for high-recall use case (Recall 0.89 at threshold 0.4, ROC-AUC 0.648); Streamlit dashboard for NGO staff

PROFESSIONAL EXPERIENCE

Digital Marketing Analyst & Affiliate Marketer — Freelance

Self-employed · Remote · São Paulo, Brazil

2017 – Present

- ▶ Managed performance marketing campaigns on Meta Ads and Google Ads, optimizing for CAC, ROAS, and conversion funnel metrics
- ▶ Multi-channel attribution analysis with Google Analytics 4; A/B testing on landing pages; audience segmentation and creative iteration
- ▶ Data-driven budget allocation decisions — experience that directly informed the transition into predictive ML modeling

EDUCATION

Graduate Specialization in Machine Learning Engineering

FIAP · 2025–2027 (in progress)

Graduate Specialization in Data Analytics

FIAP · 2024–2025 · Completed

BSc Data Science

Mackenzie · 2020–2024

BSc Business Administration

UNIP · 2019–2023

COURSES & LANGUAGES

Data Science Bootcamp — Awari

Python · Machine Learning · Statistics · SQL · Data Visualization

English — Advanced (C1)

Professional working proficiency · Reading, writing, technical communication
